Turtles Losing Ground

habitat loss
landscape fragmentation
agriculture/logging/ranching
urban sprawl
wetland decline
river degradation/diversion
road mortality
solar/wind energy installations
artificial lighting
pollutants

collection and consumption
international pet trade/trafficking
exploitation of meat/eggs
traditional medicine
nest predation
invasive/subsidized species
infectious diseases

climate change
temperature extremes
drought/fire frequency/duration
habitat loss
altered incubation temperatures
loss of nesting habitat
increased inland flooding
sea level/temperature rise

SCAN ME

After 220 million years on earth, more than half of all turtle species face extinction. Find out what you can do at www.parcplace.org.
